Almaz Toktassin

Go Backend Developer | PostgreSQL, Kafka, Redis, gRPC

Almaty, Kazakhstan | +7 706 711 9305 | almaztok8@gmail.com | github.com/nighbee | LinkedIn | t.me/ztktsn

Available immediately | Office, hybrid or remote | Kazakh (native), Russian (C2), English (C1)

SUMMARY

Go backend developer with 1.5+ years of contract work shipping Go services to production: an EdTech LMS used by ∼2,500 learners, a fintech app with a double-entry ledger (idempotency keys, optimistic locking, Kafka with retries) and an AI call-analysis SaaS. Also built a Go LLM service at QazCloud and interned at Huawei Kazakhstan. Looking for a Go team where I can own features end to end and keep growing.

SKILLS

Go: Gin, Fiber, GORM, goroutines, channels, context, sync, table-driven tests, layered architecture
Backend: REST, OpenAPI/Swagger, gRPC, WebSockets, JWT/RBAC, microservices, API gateway, idempotency, retries
Data: PostgreSQL (schema design, indexes, migrations, transactions), Redis (cache, Pub/Sub), Kafka, S3/MinIO
DevOps: Docker, Docker Compose, Nginx, Linux, GitHub Actions CI/CD, GCP, Prometheus/Grafana, unit and integration tests
Also: Python (FastAPI), TypeScript, Java (basics); OpenAI (GPT, Whisper, TTS), Gemini, self-hosted LLM (GPT-OSS)

EXPERIENCE

Backend Developer (Contract) Feb 2025 – Oct 2026
Independent contracts *Remote, Almaty*
Part-time contracts alongside university; some projects overlapped.

- **OneBilim Academy** (EdTech LMS, Jul – Oct 2026)
  - Owned backend and infrastructure in a 2-engineer team for an English-learning LMS in production: ∼2,500 active learners, intakes of 400–800 per stream, up to ∼2,000 voice-homework uploads a day.
  - Built Go services (Gin/GORM) with JWT/RBAC, an API gateway and PostgreSQL schema-per-service; added WebSocket chat over Redis, S3/MinIO uploads and OpenAI Whisper/GPT/TTS for homework checking.
  - Ran prod and staging (Docker Compose, Nginx) with backups and rollback; fixed gateway 502s under peak load.
- **BrightBund** (Technical Team Lead, social fintech, Jan – Jul 2026)
  - Coordinated up to 10 backend and Flutter developers through a closed beta of 100–200 testers: sprint planning, code review, release quality.
  - Built the Go backend (Fiber, PostgreSQL + PostGIS, Redis, Kafka, GCP): double-entry ledger with idempotency keys and optimistic locking, geo search, Kafka-based push notifications with retries, rate limiting, CI/CD.
- **SalesAI** (call-analysis SaaS, Sep – Dec 2025)
  - Built Go API and Python (FastAPI) AI pipeline for sales-call transcription and scoring (WhisperX + Gemini); cut review time per call from ∼30 to 2 minutes; integrated telephony, amoCRM and Google Sheets.
- **Earlier:** ESG platform for KBTU (Go/Fiber + React, 100+ students, May – Sep 2025); Careerly.ai job matching with Gemini (Top 30 of 200+ teams, Google Firebase Studio Championship Central Asia 2025).

Service Solution Responsible (Intern) Jul 2026 – Oct 2026
Huawei Kazakhstan, MSSD / Services & Software *Almaty (on-site)*

- Point of contact for customers: turned requirements into technical solution proposals and architecture documents for core network and base station projects, using the Huawei configurator.
- Checked customer contracts for compliant and non-compliant requirements together with technical and business teams.

Backend Engineer, AI Systems Jan 2026 – Apr 2026
QazCloud *Remote (part-time)*

- Worked on ai-glpi, a Go service that sorts IT support tickets (GLPI) with a self-hosted LLM (GPT-OSS 20B).
- Replaced forced auto-classification with human review below a configurable confidence threshold; added a thread-safe audit log and a `/stats/failed` endpoint to monitor pipeline failures.

Software Engineering Intern (Java) Mar 2023 – Aug 2023
Amazon OpenSearch College Contributor Initiative *Remote*

- Selected for a pilot program run by Amazon and Kazakhstan's Ministry of Science and Higher Education (100+ top students nationwide); worked on OpenSearch under the mentorship of Amazon engineers.
- 5 pull requests merged into OpenSearch (Java): bug fixes and tests, reviewed by the project maintainers.

EDUCATION

MSc, Software Engineering (in progress) – International Engineering and Technological University 2026 – 2028
BSc, Information Systems – Kazakh-British Technical University (KBTU), Almaty 2022 – 2026
Erasmus+ exchange, Computer Science – Ozyegin University, Istanbul Spring 2025
